

EPAct Program Update for Chet France

Module A – Status and Budget

January 27, 2008

Preliminary information – not for release outside EPA

__

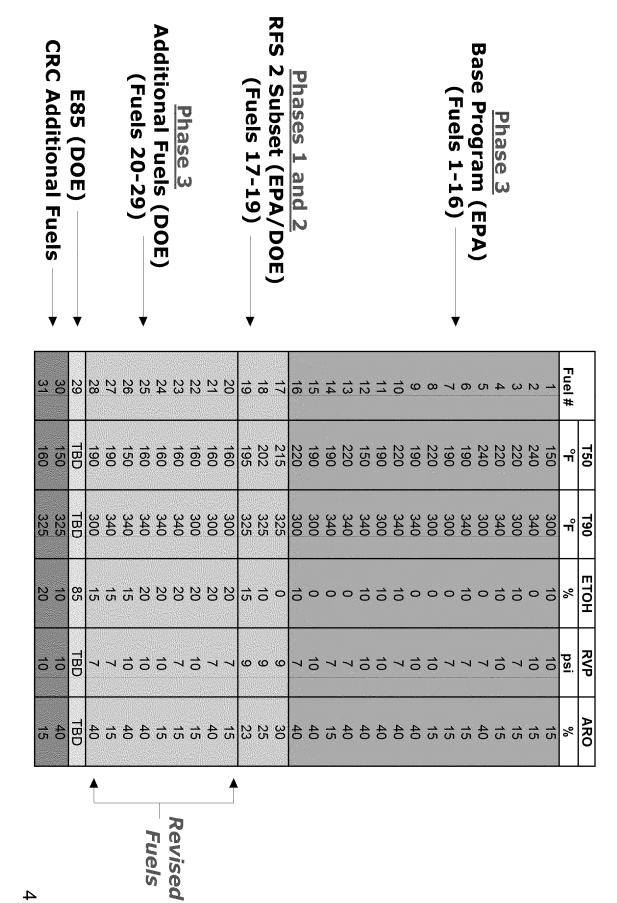

Status of Testing

- Phase 1 testing complete
- 75F testing of 19 vehicles on 3 fuels (E0, E10, E15)
- findings Data was received by EPA, briefing materials were presented on primary
- Interim FTP-cycle testing complete
- 75F testing of 6 vehicles on 3 fuels (E0, E10, E15)
- Data was received by EPA, this briefing contains primary findings
- Phase 2 testing underway
- 50F testing of 19 vehicles on 3 fuels (E0, E10, E15)
- Fuel 17 and 18 testing were recently completed
- Fuel 19 testing has begun, to be completed by 2/6
- Data is being processed at SWRI and here
- Phase 3 testing expected to begin mid-February

Fuel Blending Is On-Schedule

- Test fuel development being done cooperatively by Haltermann and
- EPA defines fuel recipes
- analyses Haltermann prepares hand blends, bulk blends and performs fuel
- 21 of the 28 fuels needed in Phase 3 have been or are being blended in bulk
- 8 have been delivered to SWRI
- E85 fuel will be obtained from CRC
- The remaining 7 fuels are in hand blend stage
- We expect to have all fuels blended in bulk by mid-February This will allow randomization of fuels for Phase 3, as planned

Revised EPAct Fuel Matrix

Budget Considerations Going Forward

Original program cost estimate: \$4,271,000

Cost overrun wrt the original scope of program:

Ex. 4 - CBI

Ex. 4 - CBI

Cost overrun including additional projects:

keeping the program intact ASD staff continuously interacts with SwRI to control costs while still

A Fuels			JEFM Resolu O (Completed)			ORIG GRAM 2009 C	1	
EmissionTesting of Two CRC Fuels	Blending of Two CRC Fuels	Miscellaneous	EFM Resolution (Completed)	F TP Testing (Partially Competed)	Fuel Cost Adjustment	EPAct Program, January 2009 Cost Estimate*	EPAct Program, April 2008 Cost Estimate	Program or Project
versevere, z			TI K	neverence.		\$ 4,698,100	\$ 4,271,000	Cost
		4	_			Ex		Cumulative Cost
			D			Ex. 4 - CBI	-	Difference of Total From the Original Estimate of \$4,271,000

Budget Considerations Going Forward (Cont'd)

Funds spent or incurred as of Jan. 27, 2009: Ex. 4 - CBI

Phase 3 (Starts in Feb. 2009); **Ex. 4 - CBI** Testing of CRC fuels: \$250,000

Current shortfall: Ex. 4 - CBI

Options to reduce cost:

Delay testing of CRC fuels: \$250,000

- Reduce the number of test fuels
- Reduction on the number of fuels by 1-2 would drop the Gefficiency of emission models below the minimum acceptable limit of 50%
- Reduce the number test vehicles
- probability of getting a non-significant result Reduction of the number of vehicles from 19 to 15 doubles the
- Reducing the number of test replicates from 2 to 1 has an even stronger impact
- Eliminate certain types of parameters measured
- Request additional DOE support

Projected Schedule Going Forward

- Launch of Phase 3 testing: Mid-February 2009
- Completion of Phase 3 testing: Early December 2009
- Reporting: December 2009 mid-March 2010

Summary of Next Steps

- Complete analysis of FTP cycle effect
- E15 data is still pending
- Complete Phase 2 testing
- Analyze and present results for E10 and E15 fuels
- Complete fuel blending and delivery to SwRI
- Perform Phase 3 testing

Additional Slides

Light Duty Exhaust Program Summary

- **EPA/DOE** collaboration
- Objective: Establish effects of RVP, T50, T90, aromatic content and EtOH on exhaust emissions from Tier 2 vehicles
- Fuel matrix includes 29 fuels + 2 added by CRC = total of 31
- Test Program Design
- Phase 1: RFS 2 Pilot at 75°F
- 3 fuels (E0, E10 and E15) tested in 19 vehicles
- Test results to be available for RFS 2 NPRM
- Phase 2: RFS 2 Pilot at 50°F
- Same as Phase 1, except temperature
- Phase 3: Main Program
- 27 fuels tested in 19 Tier 2 vehicles, E85 tested in 4 FFVs
- LA92 test cycle used throughout the program
- Species measured: Regulated emissions, CO2, NO2, VOCs, ethanol, carbonyl compounds
- N_2O , NH_3 and HCN by FTIR
- Some PM and SVOC speciation

Test Fuel Properties

	- - - - -			FUEL	
דאטדהא ד	CIVII	MEINOD	E0	E10	E15
Ethanol Content	% .lov	D5599	<0.1	9.35	14.5

Aromatics	% lov	D1319	29.3	22.9	18.7
Olefins	vol. %	D1319	6.4	5.7	5.6
Benzene	vol. %	D3606	0.48	0.49	0.46
S	mg/kg	D5453	23	23	21
RON	-	D2699	93.4	93.7	93.9
MON	-	D2700	83.5	84.9	84.6
(R + M)/2	-	Calc.	88.5	89.3	89.2

Measured Species

- Bag (phase) level and composite emissions of THC, NMHC, NMOG, CO, CO₂, NOx, NO₂, ethanol and PM
- Bag (phase) level speciated volatile organic compounds (VOCs)
- Over 200 compounds, incl. alcohols and carbonyls
- Continuous and integrated by bag (phase) emissions of the following species in raw exhaust:
- THC, NMHC, CO, CO₂, NO_x
- N₂O, NH₃ and HCN by FTIR for a subset of tests
- Semi-volatile and high molecular weight VOC and PM measured in Phases 1 and 2 only
